

ALBUM

NO MUTE

FEATHER FOR A STONE

Feather For A Stone is the third studio album by No Mute. Elements of stoner rock and metal already used by the band are combined with quieter passages for the first time on the new album. For the first time, the nine songs have spherical features in addition to the usual hard sides. In addition, many hooks and choruses are catchier and more melodic. Overall, the album is more compact.

The work was mixed by George Leodis (1000 Mods, Nightstalker and others) and mastered by Swiss expatriate Jari Antti (Navel, Harvey Rushmore and The Octopus and others).

No Mute has been around for more than 15 years. Besides touring from Hungary to Italy, the band has earned its spurs at festivals such as the Up In Smoke Festival or the Blue Moon Festival. A classic rock line-up with a charismatic lead singer ensures an energetic stage set. No Mute are a live band with more than 200 concerts under their belt.
